EDUCATION

SCRIET CCS University, Meerut — **UP, India**
B.Tech(CSE); CGPA: 8.43 — **June 23 - June 27**

SKILLS SUMMARY

- **Languages**: Python, SQL, C++, Java,
- **Frameworks**: Pandas, NumPy, Seaborn, Matplotlib, Scikit-learn, XGBoost / LightGBM ,Tensor-Flow & PyTorch
- **Tools**: Git, Power BI, Looker, Excel, Tableau, MySQL,
- **Platforms**: Jupyter Notebook, Visual Studio Code, Google Cloud, AWS(S3)
- **Soft Skills**: Rapport Building, Strong Stakeholder management, Collaboration, communication

WORK EXPERIENCE

Data Science Intern | Istudio Tech | LINK — **8 Jun 26 – 11 Sep 26**

- Developed a **Predictive Maintenance ML pipeline** using Python, Pandas, Scikit-learn and Random Forest to predict machine failures **24 hours ahead** from 10K IoT sensor records.
- Engineered **time-series rolling features**, implemented **target shifting, leakage prevention, class balancing, and chronological validation** for reliable failure prediction.
- Achieved **66.67% failure recall and 99.63% ROC-AUC** and used **feature importance/XAI** to identify vibration as the leading failure indicator.

Data Analyst Intern | Istudio Tech | LINK — **25 Feb 25 – 29 Aug 25**

- Designed automated **data quality and validation workflows** for large-scale datasets, ensuring **100% data integrity** and reducing pipeline latency by 20%.
- Delivered **15+ analytical reports and performance summaries** highlighting trends, bottlenecks, and quality gaps, enabling stakeholders to take faster, data-backed decisions.
- Conducted in-depth analysis on annotation patterns and dataset distributions, identifying **10+ actionable insights** that improved model training readiness and reduced rework cycles.

PROJECTS

Smoking Health Risk Analysis Dashboard| LINK — **Mar 25- May 2025**

- Analyzed health data of **3L+ patients** to identify smoking-related risk patterns across age groups and gender.
- Modeled risk-factor correlations across **3L+ patient profiles**, mapping multi-variable trends to support predictive risk assessment.
- Identified **high-risk age groups** with elevated health risks to support preventive insights.
- Built an interactive dashboard for quick, data-driven health analysis.

UberEats Analytics Dashboard| LINK — **Jun 25- Aug 2025**

- Analyzed transaction behaviors of **22K+ users** and **$622K+ in revenue** to segment customer lifetime value (LTV) and flag growth opportunities.
- Revealed the 18–28 age group as the highest-ordering segment, while 59+ users showed **~40% lower activity**.
- Highlighted cities with higher **avg bill value (~$28+) and stronger ratings (~3.75)** to guide regional prioritization.
- Centralized **10+ core financial and operational KPIs** into an interactive dashboard, reducing cross-functional reporting overhead.

Weather & Air Quality Prediction| LINK — **July 26- Aug 2026**

- Consolidated **15+ weather and environmental metrics** (temperature, AQI, humidity, wind, UV, precipitation) into a single real-time dashboard.
- Analyzed **7-day temperature trends**, identifying a **~3°C dip (22.2°C–25°C)** to support short-term planning and alerts.
- Visualized **Air Quality Index (PM10: 11 – Good)** along with **5 pollutant indicators**, enabling quick health-risk assessment.
- Highlighted **rain probability variations across 7 days,** helping users plan outdoor activities and travel decisions.
- Improved data readability by combining **forecast trends, AQI status, and sunrise/sunset timings,** reducing information lookup effort.

CERTIFICATES

Cloud Computing | Certificate — **November 2024**

- Completed a 12-week NPTEL course in Cloud Computing (Jul–Oct 2024).
- Earned 3–4 recommended credits, demonstrating foundational knowledge of cloud computing concepts.

IT Forensic Analyst | Certificate — **August 2026**

- Earned a Forensic AI Analyst Certificate, demonstrating knowledge of AI applications in forensic analysis and investigation.
- Developed an understanding of AI-driven approaches for analyzing and interpreting forensic information.
